

TRANSITIONING FROM SEMAGLUTIDE AND TIRZEPATIDE TO PROVEN ALTERNATIVES

WESTMORELAND
PHARMACY + COMPOUNDING

IMPORTANT UPDATE

Recently, the FDA has declared the shortage status of Ozempic/Wegovy (Semaglutide) as resolved, and our last day to dispense Semaglutide will be April 22, 2025 (unless the FDA delays their decision). Mounjaro/Zepbound (Tirzepatide) was last dispensed on February 18.

We understand many have come to appreciate the results of Semaglutide and Tirzepatide over the past two years. While this is disappointing news for many, Westmoreland Pharmacy is here to help you continue on your health journey.

We have 5 compounded protocols with proven ingredients that can be used as alternatives to Semaglutide and Tirzepatide. We highly recommend you communicate with your provider soon about which prescription is right for you.

Pricing available at info@westmorelandpharmacy.com or call us at 812-944-6500.
